S1000 is a fully photo/biodegradable blanket. The top netting and thread are comprised of non-woven nylon material while the filament matrix is comprised of wheat straw evenly which when rolled out is on top of the straw. This blanket has an ultraviolet degrader added to the polypropylene to break down quicker. Breakdown times dependent on actual ultraviolet activity.

Standard blanket dimension is 100SY. However, the blanket can be produced to any custom length and widths up to 16 feet (available after May 2007)

As described in Federal Highway Administration's
